A router with this functionality allows a Microsoft WCN-capable computer connected to the wireless AP via Ethernet to act as a WPS registrar. The test will act as a WPS registrar on the Ethernet side of the router and a WPS enrollee on the Wireless EAP side of the router. The test will send a WPS M1 message to the AP under test over wireless EAP.

For less than \$50, this router is an unbelievable deal. Note: Microsoft is going out of the wireless router business, so don't plan on future hardware upgrades and probably minimal support for firmware updates. But if you get your network up and running, you won't likely be affected by this Microsoft business decision.
